

pushTAN app set up

www.sparkasse-aurich-norden.de/pushtan

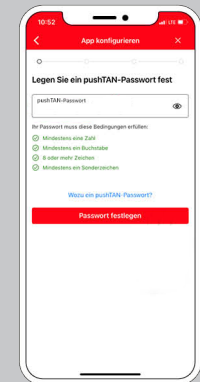

1 Start by installing the S-pushTAN app on your smart phone.

2 Start the app, and click 'Jetzt Einrichten'. Click 'Registrierungsbrief erhalten', 'Weiter' and 'Weiter' again, to allow the app to receive push notifications.

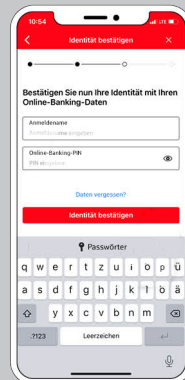

3 Now, please set a password for the app, and confirm it on the second page. You can set up TouchID or FaceID, if desired.

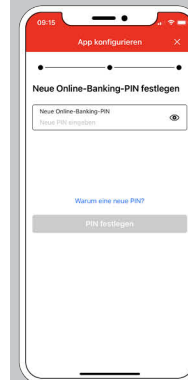

4 Allow the app to access your camera, and scan the QR-Code from the Registrierungsbrief, which you received.

5 In this step, enter your online banking user name (Anmeldename) and PIN.

6 If you received your initial login data for online banking, you will now be required to change your initial PIN (EröffnungspIN) to a personal PIN. You will also have to confirm the PIN on the second page.

You will also require this PIN in the banking app, Sparkasse Ihre mobile Filiale, and when accessing your account via online banking on our web site www.sparkasse-aurich-norden.de.

7 You have now successfully set up your pushTAN access!
